

Instant Thickening Agent

SUNUSROAT

Features of SUNUSROAT

- Thickening agent proudly made in Japan.
- Made in granulated powder which is highly soluble that allows the swift thickening of hot and cold beverages and foods for consumption.
- Able to remain at the same viscosity after mixing. Odorless and tasteless which will not alter smell and taste.
- Ease of preparation in a wide variety of liquid and food.
- Dissolves readily and easily.
- It is not affected by enzyme found in saliva and vegetables.
- Available in 500g, 800g & 2000g sealed zip-locked packaging and 3g sachet.

Recommended intake : Disolution in water 100ml

How to blend SUNUSROAT Correctly

✓ Stir right away after putting in SUNUSROAT

It won't hardly get lumpy by scattering powder in the content if you stir it right away.

✓ Place a spoon to the bottom of the container and stir well.

If you happen to stir only top section of the content in the container, the content in the bottom section of the container may not blend well. The content may turn lumpy.

✓ Do not add more SUNUSROAT after mixing process.

It is more likely to become lumpy if you add more SUNUSROAT into the content which has already thickened.

How to blend SUNUSROAT well in a glass

It mixes better by stirring a spoon backwards and forwards several times to allow the content to blend well together.

Scan the QR code for more information on SUNUSROAT.

Recommended amount of SUNUSROAT to add based on every 100ml of liquid content
